### About the Company

- **Multi-brand beauty platform** offering clean, vegan, cruelty-free cosmetics and skincare at accessible price points.
- **Signal-to-shelf model** using real-time cultural signal mining, rapid in-house formulation, and AI-supported marketing execution.
- **Mission:** make high-quality beauty accessible globally through fast innovation and community-driven product creation.
- **Funding History**  
2016: \$141M raised IPO (NASDAQ: ELF)
- **Traction / Milestones:**  
2019-2025: 26+ consecutive quarters of net sales and market-share growth  
2025: TTM revenue increased to \$1.39B; rhode scaled to \$212M+ net sales with only 10 SKUs  
2024-2025: Ranked #1-#3 in every new international retailer launched in past 18 months

### 1. Promising investment for financial return

#### Large Market:

\$100B+ mass color cosmetics + accessible skincare; expanding into prestige skincare, global retail, influencer-led brands.

#### Differentiated tech / core IP:

- Signal-to-shelf platform for rapid trend detection + product creation
- Consumer Signal Engine (TikTok, Twitch, Roblox, reviews, Gen Z workforce)
- In-house chemists + packaging engineers enabling fast, clean-formulation iteration
- AI automation for content, community mgmt., analytics; supports 27+ share-gain quarters + rhode's \$212M+ scale

#### Qualified Team with Founder–Market Fit:

CEO: 35+ yrs CPG/brand building; CMO: 25+ yrs prestige + mass beauty marketing; CFO: 20+ yrs retail finance; GC/CPO: 25+ yrs governance/regulatory. Team drove growth from \$578M → \$1.31B with >70% gross margins.

#### Clear Paths to Continued Financial Upside:

- Strong international momentum (#1-#3 in all new retailers)
- Multi-brand system validated (e.l.f. + rhode); room for further portfolio additions

### 2. Strong strategic fit with HPTV & HP Inc

#### Packaging + manufacturing modernization opportunity:

e.l.f.'s products rely heavily on plastic/glass/composite packaging; HP's additive manufacturing (MJF) can enable faster prototyping, customizable components, sustainable materials, and small-batch or localized production.

#### Strategic partnership + potential long-term M&A path:

HP could support e.l.f. with digital manufacturing capabilities, supply-chain optimization, and packaging innovation—while gaining a showcase consumer-goods partner for HP's 3D printing portfolio. Opportunities parallel HP's past beauty collaborations (e.g., L'Oréal).

#### Chance to be value-add investors:

HP's global manufacturing, channel footprint, and operational expertise could help e.l.f. accelerate packaging innovation, reduce production timelines, explore on-demand manufacturing, and strengthen sustainable packaging initiatives—directly improving cost, speed, and flexibility.

Market Opportunity

- US / North America anchor the business today, with new international retailers ramping quickly, supporting a clear global expansion path.

- Mass-market color cosmetics + accessible skincare is a \$100B+ category today, e.l.f.’s core entry wedge.
- Global beauty TAM is ~\$430B today and trending toward >\$550B by 2030, giving e.l.f. long runway for multi-brand, multi-channel growth.
- Gen Z / social-native beauty is the fastest-growing demand engine, and e.l.f. already over-indexes across TikTok, Roblox, and influencer channels.

E.l.f.’s solution & why it’s appropriate for this Market

Traditional Beauty / CPG Model

Common characteristics: slow cycles, delayed trend detection, agency-dependent marketing

- Product development cycles: slow, sequential, delaying response to fast-moving cultural trends.
- Trend detection: relies on retailers and reports, not live Gen Z behavior signals.
- Marketing execution: agency-heavy, costly, with long lead times and limited experimentation.

Technology Platform

Proprietary Approach: “Signal-to-Shelf” vertically integrated platform

- Consumer Signal Engine: mines TikTok, Twitch, Roblox, reviews, and DMs for live trends.
- Creation Engine: in-house chemists rapidly convert signals into clean, high-performance products.
- AI Automation Layer: accelerates content & community, analytics.

Competitive Landscape

**Closest direct threat:** Prestige indie innovators, which compete on “clean/premium” story but lack e.l.f.’s price-value and speed.

**Market entry challenge:** Global conglomerates + artistry specialists, with long-term retailer contracts, heritage brands, and broad portfolios.

**e.l.f. competes in a crowded landscape but with a disruptive “signal-to-shelf” platform—winning on speed, cultural relevance, and value rather than scale or legacy. Fast, disciplined GTM execution will make or break share gains in each cluster.**

| Cluster 1              |                                  |            |                            | Cluster II      |                               |                               |                        | Cluster III                   |                            |                               |                                         |

| Coty                   | \$6.1B revenue (public – COTY)   | Multiple   | Fragrance R&D, licensing   | Tower 28 Beauty | Seed/Series A, ~\$20M+ raised | Multiple                      | Derm-tested formulas   | NARS                          | Series A, ~\$11M raised    | Prestige makeup only          | Pro-artistry, high-performance pigments |

## Leadership Team

## Risks & Areas of Further Diligence Required

### CEO: Tarang Amin

- 35+ years CPG and brand-building experience (Clorox and Schiff Nutrition).
- Public board roles add governance and M&A depth

### Global GMO: Kory Marchisotto

- 25+ years prestige and mass beauty marketing (Shiseido, bareMinerals).
- Architect of e.l.f.'s culture-first, Gen Z-native growth engine.

### CFO: Mandy Fields

- 20+ years retail/consumer finance (Safeway, Albertsons, BevMo!).
- Helped drive \$578M → \$1.31B revenue while protecting >70% gross margins

### Team Strengths

- Deep, directly relevant experience across CPG, beauty, retail, and governance.
- Proven execution: 27+ consecutive quarters of net sales and share growth.
- Culture-aligned org (76% women, 74% Gen Z/millennial) powering insight engine.

### Possible Gaps

- No C-level owner for AI, data science, and platform engineering.
- Limited visible structure for multi-brand portfolio integration at scale.
- Global regulatory and operational depth not yet fully demonstrated.

## APPENDIX: Deep-Dives and Detailed diligence reports
